# **CARECLEAN FORMULA #4**

## Acidic cleaning cleaner for removal of hardness stains and residues after tank cleaning operations

#### DESCRIPTION

Careclean Formula #4 is used for the removal of hardness stains after tank cleaning operations, brightening metal surfaces and removal of rust stains from paintwork.

## ADVANTAGE

- Effectively removes hardness stains
- Highly concentrated formulation
- Safe on epoxy coatings and stainless steel

## **APPLICATION**

- Removal of hardness stains in cargo tanks
- Removal of iron ore, limestone (carbonates), magnesite
- Removal of rust stains on paintwork, wood and plastics

## DIRECTIONS FOR USE

## Tank Cleaning

In case hardness stains and/or residues are present after completion of tank cleaning operations, either inject 0,2 - 0,5 % Careclean Formula #4 directly into the automatic washing system for approx. 30 minutes to 1 hour (with a minimum of 1 cycle) or circulate a 0,2 - 0,5 % solution of Careclean Formula #4 in freshwater at a temperature is 75 - 85 °C for 1 hour. Careclean Formula #4 is suitable to be used on epoxy and stainless steel coatings, it is not suitable to be used in zinc coated tanks.

## Paintwork

Dilute Careclean Formula #4 to a 5 - 10 % solution in water. Apply the solution by brush or spray using plastic equipment. Leave to soak for 10 - 20 minutes. Rinse off using a powerful water jet and a brush, if necessary.
