CARECLEAN BULK CR

Acidic cleaning product to remove cement, limestone and mineral deposits in hold cleaning applications

DESCRIPTION

Careclean Bulk CR is based on hydrochloric acid.

Careclean Bulk CR is used for the removal of cement, limewash/-stone and other mineral deposits for instance coming from cement cargoes in hold cleaning applications.

ADVANTAGE

- Safe on most coatings
- Removes cement stains without risk to paintwork, coatings etc

APPLICATION

- Removal of cement, limestone (carbonates), magnesite & calcium from cargo holds
- Removal of rust stains on coatings and paintwork

DIRECTIONS FOR USE

Cargo Hold Cleaning

Careclean Bulk CR is used to clean cargo holds after cargoes such as cement, limestone (carbonates) and magnesite and to remove any white residues from caustic cleaners or hardness deposits from seawater. After sweeping and de-mucking apply Careclean Bulk CR in a 10-50% solution depending on the contamination. Let the product soak for 30 minutes making sure not to let the solution dry on the surface. Then spray off with water.

Careclean Bulk CR can be applied with the *Caretech Application Kit SU*. Since Careclean Bulk CR is very corrosive on metals, ensure to rinse out the pump, hoses and lance with fresh water, inside and outside, after each use.

- Biodegradable

- Approvals:
 - > IMO MEPC COMPLIANT

MARINE CARE

DOSAGE

Hold cleaning 10 - 50 % solution

PROPERTIES

pH 1,0
Density 1,15 g/cm³
Flashpoint Not applicable
Physical state Liquid, transparent to light yellow

AVAILABLE PACKAGING

Drum

APPROVALS

- IMO approved in accordance with MEPC guidelines

All our supplied hold cleaning chemicals are IMO approved & comply with the set Marpol MEPC 63/23/add. 1, Annex 24 resolution MEPC.219(63) – Annex V – 2012 guidelines adopted March 2012.
