CARECLEAN BULK RR

Acidic cleaning product to remove rust, limestone and mineral deposits in hold cleaning applications

- Biodegradable
- Suitable on most metals and coatings
- IMO MEPC COMPLIANT

DESCRIPTION

Careclean Bulk RR is based on phosphoric acid and surfactants. Careclean Bulk RR is used for the removal of rust, limewash/-stone and other mineral deposits for instance coming from iron ores in hold cleaning applications.

ADVANTAGE

- Safe on most coatings and common metals
- Removes rust stains without risk to paintwork, coatings etc
- Leaves a preserving phosphate layer on carbon steel when applied in low dose and not rinsed

APPLICATION

- Removal of iron ore, limestone (carbonates), magnesite & calcium from cargo holds
- Removal of rust stains on coatings and paintwork

DIRECTIONS FOR USE

Cargo Hold Cleaning

Careclean Bulk RR is used to clean cargo holds after cargoes such as iron ore, limestone (carbonates) and magnesite and to remove any white residues from caustic cleaners or hardness deposits from seawater. After sweeping and de-mucking apply Careclean Bulk RR in a 10-50% solution depending on the contamination. Let the product soak for 30 minutes making sure not to let the solution dry on the surface. Then spray off with water.

Careclean Bulk RR can be applied with the *Caretech Application Kit SU*.

MARINE CARE

DOSAGE

Hold cleaning 10 - 50 % solution

PROPERTIES

pH 2,0
Density 1,28 g/cm³
Flashpoint Not applicable
Physical state Liquid

AVAILABLE PACKAGING

Can, drum

APPROVALS

- IMO MEPC compliant

All our supplied hold cleaning chemicals are IMO approved & comply with the set Marpol MEPC 63/23/add. 1, Annex 24 resolution MEPC.219(63) – Annex V – 2012 guidelines adopted March 2012.

For detailed information on safety and health, please refer to the Material Safety Data Sheet MSDS and/or product label.
