CARECLEAN STAINLESS PROTECT

Easy to use maintenance aerosol for stainless steel surfaces in harsh conditions, preventing corrosion caused by chloride deposits

- Gives long lasting protection against corrosion by chlorides
- Excellent shiny result
- Suitable on all metal surfaces

DESCRIPTION

Careclean Stainless Protect is a mineral oil based product that allows stainless steel surfaces to continue passivation with oxygen, whilst at the same time providing a protective buffer layer for chlorides (salts) that can lead to corrosion.

ADVANTAGE

- Gives long term protection against corrosion
- Removes marker and mild stains (fingerprints)
- Ready to use solution, economical in use

APPLICATION

- Especially for stainless steel in high chloride environments such as open sea and coastal areas > (cruise) ships, coastal architecture

DIRECTIONS FOR USE

- Ensure the surface is cleaned with Careclean Stainless Gel
- Rinse surface well with fresh water (until pH neutral)
- Dry surface with cloth and immediately apply Careclean Stainless Protect
- Wipe out equally with a clean cloth to a dry equal layer

PROPERTIES

pH	n/a
Density	0,67 g/cm ³
Flashpoint	365 °C
Physical state	Aerosol

For detailed information on safety and health, please refer to the Material Safety Data Sheet MSDS and/or product label.
